

Laser Shot's C/CAT is a portable, modular, barrier system which allows shooters to utilize cover and concealment, enhancing simulated and force-on-force training scenarios.

# C/CAT

Cover Concealment Angle Trainer **LASER SHOT**

Barricades measure 4'x6' and are built with modularity in mind. A C/CAT can be configured to replicate obstacles found in the field, such as: doorways, hallways, corners, and other architectural layouts. Barriers also incorporate 2'x2' removable panels to create apertures and windows.

Each C/CAT system is comprised of two barricades which can be set up and torn down in minutes. The entire system packs easily into a single case measuring 13'x39' and weighs only 46 lbs.
